A MEMBER OF

VENUE CAPACITY IN LINE WITH COVID-19 GOVERNMENT GUIDELINES AND DIRECTIVES

The capacity of the venue has been re-calculated to ensure that there are enough provisions made for social distancing between attendees. **The re-calculation is made by means of allocating an occupancy of no less than three (3) square meters per attendee** rather than on a person per sqm standing or 2 persons per sqm seated. Recalculating the capacity requires to take into account all obstructions, furniture, set, concessions, exit aisles, etc.

Using a framework which takes into account capacity and capacity density, the ability to social distance and the level of compliance with these guidelines, it will be reasonably practicable to host the event based on the different levels of risk criteria.

To ensure a low risk of transmission of the COVID-19 virus, our event will have the following compliance measures in place:

- Appoint a person in the role of compliance officer
- Provide a risk assessment for COVID-19 exposure determining the risk profile of the event
- Provide a COVID-19 Strategy for the event including control measures
- Provide health screening processes for staff, workers and attendees alike
- Provide hygiene stations and relevant PPE
- Provide safe work procedures and site rules based on COVID-19
- Provide awareness and training where applicable
- Practice social distancing based on 1.5m between people at all times
- **Provide capacity density of 1 person per 3sqm**
- Be able to contact trace all staff, workers and attendees with relevant information
- Communicate prior, during and after with workers, staff and attendees
- Provide sealed meals, sealed beverages and sealed utensils
- Be able to disinfect the venue prior and post the event
- Provide a cleaning solution during the event based on COVID-19 requirements
- Provide a waste management plan based on COVID-19 requirements

WTM AFRICA

VENUE CAN ACCOMMODATE UP TO **5 000 PAX PER DAY**

** subject to government directives and guidelines
